CAREER OBJECTIVE

- To seek competitive and challenging position with an organization that provides an opportunity to capitalize my technical skills.

PROFESSIONAL SUMMARY:

- Having 2.9 year experience on development in **Robotic Process Automation (RPA)**.
- UiPath and Automation anywhere advance certified.

TRAININGS AND CERTIFICATIONS:

- UiPath Advance RPA Developer Certified.
- UiPath RPA Developer (Academy 2) Certified.
- UiPath RPA Developer Foundation Certified.
- Automation Anywhere Certified Advance RPA professional (V11.0).
- Automation Anywhere Master Certified.
- Completed Orchestrator 2018.2 Training.
- JEE Training from Capgemini.

TECHNICAL SKILLS:

Tools	:	RPA (UiPath, Automation Anywhere and Automic)
Languages	:	Core Java, SQL, VBA, Basic Python.
Automation skills	:	Excel Automation, Web Automation, E-mail Automation, PDF Automation, Image/OCR Automation

PROJECTS:

Client: All North American Business Unit Projects in Capgemini.

Duration: July 2017 – Present

1. Provisioning Error

Technologies: UIPATH **Role:** Lead Developer

Description: Provisioning Error Handling is process in which BOT read GRC (Governance, Risk and Compliance) Number from the Incidents in **BMC Remedy** according to summary of incidents. BOT will fetch error occurred date from **GRC** and it will search error for particular Date in **SAP** System and BOT will solve 4 types of provisioning errors that is a) User does not exist b) Maximum number of profiles exceeded c) RFC Error d) Maintenance of User.

2. Purchase Group Create/Update/Delete

Technologies: UIPATH **Role:** Solution Architect and Lead Developer

Description: The purpose of the automation is to create/Update/Delete Purchase Group. Developed an Automation to read all the tickets from **BMC Remedy** and Identify Purchase group Ticket, Create Change Request for that ticket in **ChaRM**. BOT will do Configuration and Testing in **SAP Development** system and simultaneously create configuration

and testing document. BOT will move the request in **SAP QA** and **SAP production** system. After confirmation of user BOT will close Ticket.

3. **Remedy Ticket Assignment**

Technologies: Automation Anywhere **Role:** Lead Developer

Description: BOT will login to Remedy and extract incidents and work orders from remedy. BOT will check if any incident status or work order status is open and Assignee is blank BOT will assign the incident and work order to user according to roster file.

4. **User Unlock and Password Reset**

Technologies: UIPATH **Role:** Lead Developer

Description: The purpose of automation is to unlock the user and reset password for user. In this user provide one excel file of users BOT will search UserID in application and will check is user locked or not if user is locked BOT will unlock the user and generate new password for user. After that BOT will add that user in SAP system.

5. **JDE Support Batch Monitoring**

Technologies: UIPATH **Role:** Lead Developer

Description: The Purpose of this use case is to automate the manual job of monitoring jobs in Automate Schedule application to check whether particular job is taking more time than threshold time, jobs are failed while running or jobs are not started at the scheduled timing in such case, send an alert to JDE support team and create CCSN incident with given instructions.

6. **SAP Monthly Validation**

Technologies: UIPATH **Role:** Solution Architect and Lead Developer

Description: The purpose of the automation is to validate different Transaction Code is working fine or not after doing monthly update in SAP System. This is monthly activity.

7. **Incident Monitoring Calling BOT**

Technologies: UIPATH **Role:** Lead Developer

Description: The purpose of the automation is to monitor P1 Incidents in Service now and assign the resource as per the roster file and inform resource by call.

8. **V-Plant Creation Automation**

Technologies: Automation Anywhere **Role:** Developer

Description: The purpose of the automation is to Create V-Plant. BOT Filter Service Now Incidents and Download Attachment from Incident. After that BOT Creates Change Request and Transport Request then BOT Login into SAP and Copy all source V-Plant data to new V-Plant using SPRO T-Code. At last BOT Close the Incident in Service now.

9. **Incident and Problem Ticket Reporting**

Technologies: UiPath + VBA **Role:** Developer

Description: The purpose of the automation is to generate report in which BOT will update chart, Pivot table for Problem and Incident dumps that we will get by email from Account team.

RESPONSIBILITIES CARRIED OUT FOR ALL AUTOMATION PROJECTS:

- Identified manual process and did requirement gathering, so that we could automate those processes.
- Created different documents related to automation projects.
- Created flowchart and sequences according to UiPath best practices to create bots.
- Identifying exceptions and its solution by testing each activity. Used debugging features present in UiPath Studio.

- Did development of front end and back end bots to automate number of processes.
- Responsible for provisioning of those bots in UiPath orchestrator and schedule them.

ACHIEVEMENTS:

- Got appreciation for the work done in Capgemini in the form of “Extra Mile” Certificate.
- Got certified in Uipath for both basic and advance level.
- Got certified in Uipath Orchestrator and RPA infrastructure training.
- Got certified in Uipath non-technical trainings like RPA implementation methodology and RPA awareness.
- Got certified in Automation Anywhere.
- Got certified in Advance Automation anywhere.

EDUCATION:

College / University	Passing Year	Degree	Percentage
North Maharashtra University	2013-2016	B.E.	73.10
G.H. Rasoni Polytechnic College, Jalgaon	2010-2013	Diploma in Computer Engineering.	72.90
L. N. S. High School, Jalgaon	2009-2010	SSC	86.60

Personal Details:

- **Date of Birth:** 14th Sep 1994
- **Current Address:** Flat no 403, Padmavati Residency, Kamothe-Thane, 4100209
- **Alternate Mobile Number:** 7020206920
